

ENECON's DuraFill & Some Imagineering Make This Garage Floor Look Like "A Million Bucks"

This one of a kind garage floor was created with ENECON's DuraFill, 180,000 pennies and some "imagineering".

Sections of the floor were first rolled out with ENECON's DuraFill. It then took 12 people, 100 hours to complete this incredibly artistic and unique layout. After the pennies were arranged, DuraFill was again used to seal the pennies in place and protect the floor from vehicles, family parties and general man cave events.

Here are some interesting facts about the floor:

- Oldest Canadian penny - 1929.
- Oldest U.S. penny - 1924.
- 2 pennies from Bermuda.
- 2 pennies from Newfoundland.
- 1 sixpence.
- 1 10 cent Euro.
