

ENECON[®] NEWS

U.S. Products Supporting Canadian Oil Industry

ENECON Corporation's CHEMCLAD SC and CHEMCLAD XC, manufactured in Medford, NY, is proving to be an extraordinary, V.O.C free, erosion / corrosion fighting solution for the Canadian Oil industry's field portable collection tanks. These

tanks are subject to various corrosive liquids and extreme weather and temperature changes.

ENECON products are V.O.C. free. This unique, durable, environmentally safe solution has allowed a local Canadian application

company to expand beyond its warehouse doors and offer mobile industrial tank, secondary containment and equipment erosion and corrosion solutions. This service will save the customer transport costs and damage. This service also shortens the turn-

around time and reduces the WCB claims associated with spraying V.O.C containing products.

Various contracts have already been established with this application and we look forward to a long, productive relationship with the Canadian Oil industry.
